

I'm sitting by the rivers and I watch the birds fly
And I'm thinking that maybe I can touch the sky
I wanna be like a bird, I wanna be free
I wanna be everything I'd ever want to be

The clouds are rolling and the wind is blowing
The leaves are falling and rivers are flowing
I'm gonna take the biggest step I've ever taken
I spread my arms and say take me away

The time is now to stand and make myself a change
I wanna make a difference into my own life
I take the hand of an angel and I cry
I wanna feel like I am flying sky high

I'm standing in the field and I look into the sky
I feel the ones I love standing right beside me
I hear the voices saying we're always here for you
It's time to make this world a better place

The clouds are rolling and the wind is blowing
The leaves are falling and rivers are flowing
I'm gonna take the biggest step I've ever taken
I spread my arms and say take me away

The time is now to stand and make myself a change
I wanna make a difference into my own life
I take the hand of an angel and I cry
I wanna feel like I am flying sky high

The time is now to stand and make myself a change
I wanna make a difference into my own life
I take the hand of an angel and I cry
I wanna feel like I am flying sky high

I'm sitting by the river and I watch the birds fly
And I'm thinking that maybe I can touch the sky
I wanna be like a bird, I wanna be free
I wanna be everything I'd ever want to be
